

Creditor Data Platform – decentralized personal data marketplace runned by Blockchain veterans

Our Vision

Revolutionize the data processing market through a decentralized data exchange, where individuals can sell authentic and verified personal information to data buyers and brokerages.

Bonuses for Private Sale investors: **+100%**

Tokens created: **3,400,000,000**

CDP token for sale during the TGE: **1,700,000,000**

Unsold tokens will be burned

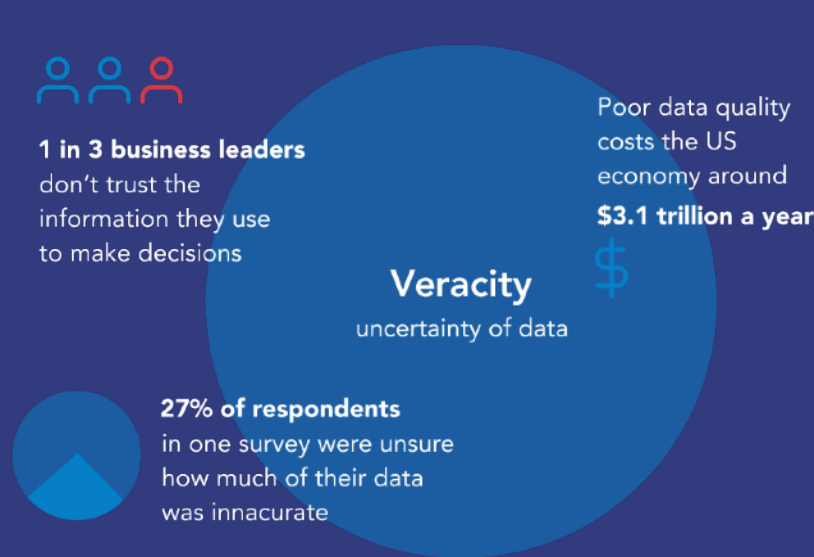

Sale Participation

You can buy CDP with Bitcoin, Ethereum, STORJ, NEO, NEM, BCH, ETC.

Traction

8 clients **3** partners **2000** transactions

Roadmap

The Creditor Data Token

We create a utility token with a deflation mechanism as suggested by Vitalik Buterin. Creditor Data Platform tokens can be used data and related services within the Creditor ecosystem. Once tokens have been used for a purchase we will burn a percentage of these tokens (i.e., deflation) to support the future value increase of the creditor token. Also, the creditor token (ticker symbol CDPT) will be listed at token exchanges for trading.
